Professional Summary

I'm a Project Manager with a strong technical background and 5 years of experience in the software industry, leading teams and delivering successful projects across multiple domains. I specialize in requirement gathering, sprint planning, and stakeholder collaboration, ensuring projects stay on track and meet business objectives.

I have successfully onboarded multiple clients, transitioning them from trial phases to long-term partnerships by aligning their technical needs with strategic goals. My expertise includes breaking down complex requirements, managing development roadmaps, and optimizing workflows to improve efficiency and delivery.

Beyond project execution, I provide technical consultation, guide teams through challenges, and ensure seamless collaboration between developers and stakeholders. My ability to bridge the gap between technical and business requirements allows me to drive scalable solutions, improve system performance, and deliver high-impact results.

Professional Experience

Global Project Manager
Geeks Ltd — Oct 2025

- Led solution design workshops with clients, translating business requirements into Agile project roadmaps and contributing to the delivery of projects generating over $500K in revenue.
- Managed a portfolio of 18 concurrent projects, ensuring on-time delivery, effective change request management, and ongoing maintenance support while maintaining high client satisfaction.
- Directed backlog prioritization, roadmap planning, and sprint execution, enabling predictable delivery timelines and improved alignment between business objectives and development teams.
- Supervised and mentored development teams, optimizing workflows and processes to achieve a 4% increase in operational efficiency, an 8% improvement in milestone achievement, and a 3% reduction in defects and client rejections.
- Established and facilitated weekly delivery and project management governance sessions, improving cross-project visibility, proactive risk management, and contributing to an average CSAT score exceeding 80%.
- Designed and implemented a standardized project offboarding framework, resulting in a 5% increase in operational efficiency while reducing transition-related errors and delivery delays.

Project Manager
CareCloud — Mar 2025 – May 2026

- Directed backlog compilation, prioritization, and roadmap planning, ensuring seamless migration of deliverables into JIRA and enabling on-time sprint execution.
- Oversaw SOX audits, Vendor Risk Assessments, and compliance processes, ensuring adherence to organizational and regulatory standards with zero delays.
- Designed and implemented resource allocation models, tracking systems, and workflow enhancements, improving task visibility and team efficiency by at least 20% and reducing team errors by 80%.

- Facilitated cross-functional communication through structured meetings, executive presentations, and reporting, driving stakeholder alignment and project clarity.
- Guided and mentored team members on JIRA usage and task management, providing continuity as backup PMO and ensuring uninterrupted delivery on critical projects.
- Reviewed outputs and implemented quality check frameworks, proactively identifying major issues and safeguarding delivery timelines on high-priority projects.
- Developed documentation standards, onboarding/offboarding materials, and training sessions, strengthening knowledge management and enabling smoother team transitions.

Project Manager
Gitstart Feb 2023 – Feb 2025

- Managed project timelines and sprint goals, ensuring 100% alignment with client specifications and successfully delivering projects on time and within scope.
- Led the development and maintenance of client codebases, successfully delivering new features that enhanced functionality and user experience.
- Collaborated with multiple clients to define project requirements, creating detailed specification documents that resulted in accurate cost and time estimates, reducing project overruns.
- Streamlined development workflows by breaking down user stories into actionable tasks and documenting system limitations, leading to at least 21% improvement in sprint efficiency.
- Advised clients on feature development and system constraints, enabling them to make data-driven decisions that optimized product roadmaps and accelerated time-to-market.
- Implemented infrastructure improvements that enhanced system performance and code quality, leading to a 15% reduction in delays and improved scalability.
- Managed multiple teams simultaneously having 10+ members, working on different projects.
- Mentored and guided 10+ junior engineers, resolving technical challenges and improving team efficiency, resulting in a 17% increase in development velocity.

Website Developer and Manager
Safeway Renewable Energy (Pvt) Ltd. May 2021 – Oct 2021

- Maintained and updated website content daily, ensuring uptime and optimal performance.
- Monitored customer feedback, implementing improvements that enhanced user satisfaction.
- Performed regular security checks, reducing vulnerabilities by 8%.

Education

COMSATS University, Pakistan March 2023 – March 2025
Masters in Project Management CGPA: 3.96/4.0

- Graduated top of the class as Summa cum laude.
- Got awarded a Merit Scholarship by university administration for showing excellence in exams.

COMSATS University, Pakistan March 2018 – March 2022
Bachelor of Software Engineering CGPA: 3.57/4.0

- Graduated top of the class and awarded Gold Medal for getting 1st position in the batch.
- Got awarded a fully funded Merit Scholarship by Government of Pakistan for showing excellence in exams.
